

GSD

GOLF SIGN & DESIGN

GOLF, RACQUET, SWIMMING, YACHT & BEACH CLUBS

Golf Sign & Design (GSD) was founded in 1991 by former PGA Tour player, Tom Eubank.

What started as a highly successful yardage guide and sprinkler marking business, soon evolved into tee markers, on-course signage, and a host of other products golf courses use on a daily basis. In 2014 GSD continued to add to its lineup and quickly became the leading manufacturer of golf course furniture in the Southeast. Our clientele now includes many of the finest clubs around the world who trust us to create and fabricate their high-end furnishings.

Our on site operation team is led by PGA professionals who intimately understand the products we create. Our team is dedicated to ensuring that our quality always meets the highest standards for our clients. In addition, our design team never stops looking for ways to enhance our product line in both usability and life span. Our team of designers will also work with you to create custom products specific to the unique needs of your facility.

GSD is a proud sponsor to many of the PGA sections throughout the southeast and beyond. We are excited for the opportunity to work with and serve these members. Whether you are a new course, renovating, or simply looking to update your amenities, give us a call to help enhance your facility.

Package Pricing

We cover everything from furnishings on course, driving range, clubhouse, pool, tennis, signage, golf course photography, 3D yardage guides and more.

Style

All units are offered in key arch or straight frame.

Structure

We strictly use stainless steel hardware and powder coated screws in order to withstand the elements of coastal environments. In order to minimize and even prevent warping, we add powder coated aluminum bracing to many of our items including tables, benches, chairs, and more.

Color

Our selection of colors that we keep in stock is 10 solid colors and 3 woodgrain finishes. Two-tones are never an additional cost. Other colors including the three special order woodgrains are available for larger orders if time permits.

Premium wood grains have a small 7% up charge. Minimum order size may apply.

Recycled HDPE

HDPE (High Density Polyethylene) is a composite plastic lumber. Composed of recycled Type 2 plastic, commonly found in milk, soap, and oil containers. The material is not only environmentally friendly, but also very resistant to impact, friction, chemicals, and moisture, making it incredibly durable in a wide array of environments.

Unlike wood that requires frequent maintenance, the HDPE material will last far longer without fading, cracking, chipping, or decaying. Often our clients get 10+ years before seeing any significant fading. HDPE is the perfect all weather material with the least amount of maintenance possible. A light pressure cleaning yearly with a wet rag keeps your furniture looking new for years.

“ Recently, Belfair needed to update our course furniture for our Practice Range and Starters. We ended up selecting Tom Eubank and his team at Golf Sign & Design. The personalized service and attention to our needs I received were as good as I have experienced in my career as a PGA Professional. Not only was the product outstanding, but the pricing was more than fair.

Thank, Tom, and your exceptional team at Golf Sign & Design! ”

John Ogden, Director of Golf
Belfair

Metal cooler box inserts

No other manufacturer comes close to the quality of GSD's unique cooler design. Our one of a kind boxes are fabricated out of thick aluminum, powder coated with a food grade coating, and insulate the ice far longer than any other brand.

The base of the insert tapers to allow full drainage of all left over water for an easy cleaning of the units as needed. Beneath the pan and out of sight is a brass release fitting allowing you to drain as needed. Our metal inserts are encased in 1.5" of HD insulation with a R factor of 6 to extend the ice retention.

Hidden brass valve release

Tension Gas Strut allows lid to stay open while in use and a slower close action when shutting.

“ Golf Sign and Design came in and provided a proposal for us for our renovation that not only saved us money, but also kept us from having to hire 3 different vendors. They provided all of our furniture, including custom pieces, our signs for the course and clubhouse, our yardage books and they even measured our course as part of the package. I have received great service and always at a very fair price. I recommend Tom Eubank and Golf Sign & Design to anyone needing furnishings, signage or yardage guides.”

“ Our facility went through a clubhouse expansion and renovation in 2021-2022. Part of that expansion was of our patio and all new patio furniture. We looked at many different patio sets from many different companies. Then in January 2022, we met Tom with Golf Sign & Design at the PGA Merchandise Show. We were absolutely thrilled with the quality of their patio furniture and invited them to bid on our project . We received our patio furniture in May 2023, and we absolutely love it and so do our customers. I would highly recommend talking with Tom and his team if you have any outdoor furniture or on course needs. ”

Logo Options

Cast Aluminum or Bronze

Cast logo medallions are available in aluminum or bronze depending on your preference and color scheme. These are traditional styles of branding your logo on to the furniture with a long lasting maintenance free logo. Cast logo's tend to run from 4-8" in size but can be made any size desired.

Vinyl Inlay

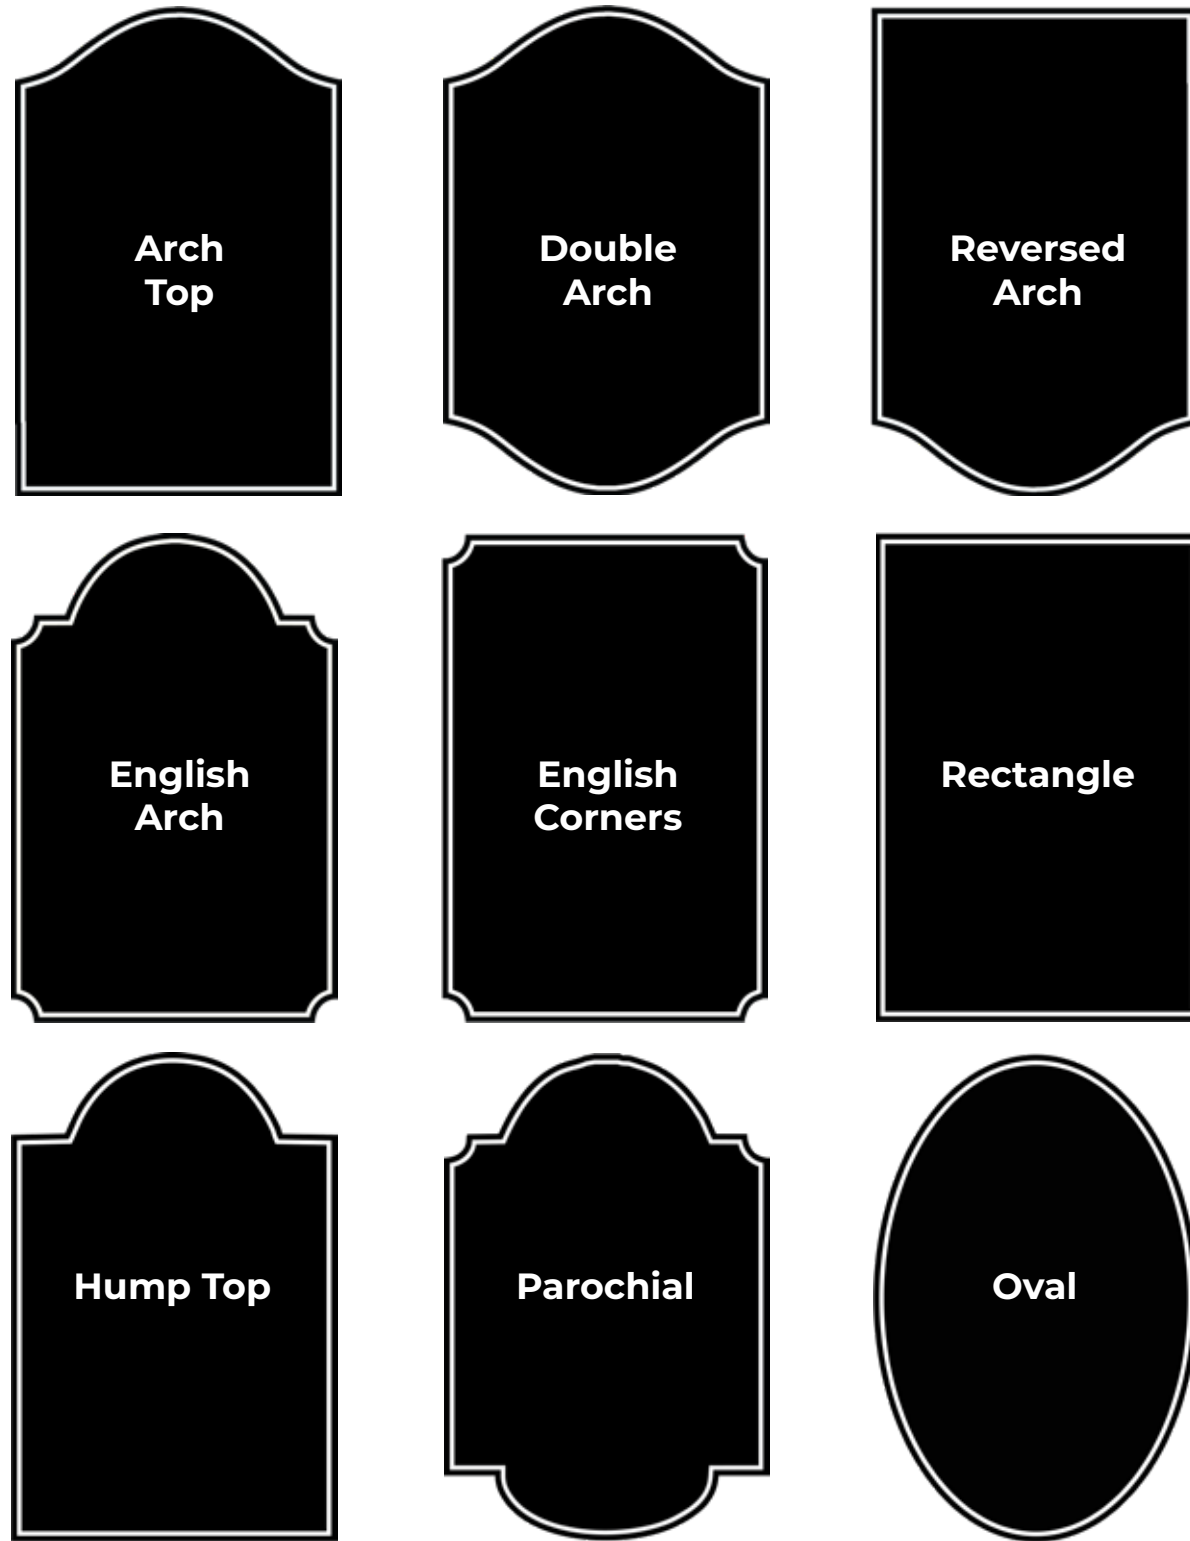

We produce these logo's in house on UV treated vinyl for longevity. Once they are installed we add a clear layer of UV resin over top of the vinyl to ensure long life.

Color Pour

Color pour works on logo's that are not too intricate where our CNC router is able to route out the image area. We then use a hardened lacquer style paint similar to automotive paint; which is hard as a rock and fade resistant. The result is a clean classic looking logo that can be done in single or multiple colors depending on the logo design.

Custom Colors

At GSD we have the capability to powder coat ball washers in any color.

Hammertone finishes are also available.

Ball washer brackets fitted for both round and square posts.

Cast Aluminum

With its neutral tone cast aluminum holds much aesthetic versatility. In the casting department cast aluminum is more budget friendly, allowing for extensive options. The silver coloring not only provides a sleek, contemporary appeal, but it also compliments any colored background. We also offer face painted aluminum if you are looking for a two-tone color scheme, making them highly customizable. Another aspect of aluminum it is lightweight, allowing for more flexible mounting options.

Cast Bronze

Cast bronze adds a royal appeal to your facility, defining class, distinction, and strength. Bronze is an alloy composed of copper and tin, making it more sturdy than any other metal alloy. Just as with cast aluminum signs, bronze signs are finished with a special PPG paint providing a lengthy life. In order to retain its luster the exposed bronze is sealed in a clear lacquer. Ideal for exterior plaques, tee markers, and signage.

Sheet Aluminum

Commonly used as road signs, sheet aluminum signs hold a variety of options for your facility. Depending on the purpose of the sign, sheet aluminum signs can be either finished in a High Prismatic or Engineer Grade vinyl overlay. High Prismatic is used by DOT on all standard road signs due to its high visibility at night. On the other hand Engineer Grade is primarily used for standard signs that do not require night time visibility. Each options holds a 10- 15 year lifespan.

Resin Core

Resin Core is an appealing yet economical material for an assortment of signage. The material is a dual colored layered plastic suited for engraving. Once routed the material's colored thin outer layers are contrasted by its thick core; making it ideal for signage. The plastic is proven to never delaminate, fade, crack, or require refinishing. Resin Core is made of heavy duty polymer making it resistant against high impact, graffiti, and harsh outdoor conditions.

High Pressure Laminate (HPL)

What is HPL? Its all in the name; HPL is made by layering high-res printed graphics and overlays with resin-infused kraft paper. The resin permeates the digital print and all materials are unified into a single panel of a dense thermoset plastic. Not only is HPL durable, but it is also low maintenance. Graffiti proves inferior to the finish of HPL, clean up is an easy task with basic soap and water. This unique material is suitable for signs with a graphic aesthetic in place. Due to the four color printing process we are able to print images, textures, and graphics.

Stanchions

Cast Aluminum

Cast aluminum is sand cast, identical to the process bronze is cast, but is much lighter, and of course has a different color and look. It may be the best fit for your club due to the lower cost and the long life it offers.

Directionals

Entrance Signs

Face Painted Aluminum allows you to capitalize on the lower cost of aluminum while enjoying the look of bronze. We simply roll the raised areas in a gold paint and you have a classic look without the extra cost.

Cast Bronze
Cast bronze has long been the classic option for the discerning golf course. Ideal for exterior plaques, tee markers, and signage.

Entrance Signs

Directionals

HPL

This unique material is suitable for signs with a graphic aesthetic in place. Due to the four color printing process we are able to print images, textures, and graphics.

Pin Location

Sheet Metal

Commonly used as road signs, sheet aluminum signs hold a variety of options for your facility. Signs can be finished in a reflective or flat vinyl overlay, perfect for traffic or wayfinding signage. These signs typically hold a 10-15 year life.

“ Working with Golf Sign & Design and Tom Eubank has been a fantastic experience. He works with you on creating the products you need and gets it delivered in a timely manner. Our ranges and first tees at both Pinehurst No. 7 and 9 have never looked better. ”

Cole Stiles, Head Professional
Pinehurst No. 7 and 9

Yardage Guides

What used to be a tool for golfers to play better and familiarize themselves with a new golf course has evolved into more of a marketing book than anything. With technology changing, these books are rarely used for yardages but rather something your guests can take with them as a memory they experienced at your course. At GSD we create only high quality guides with dimensional graphics you can't find anywhere else. Call to get a quote on a marketing piece that will be exceptional in every category.

11 PAR 5

654 630 574 550 513 486 486

Courage and accuracy off the tee can make this intimidating, long par 5, be much more manageable. Tee balls carrying or curving around the deep sandy waste area on the inside of the dog leg finding the left half of the fairway can catch the big downhill "speed slot" that could advance the ball another 100 yards forward. Large sandy waste areas protect both sides of the second landing area challenging the golfer to lay up or try to hit past them. The sloping green sits on top of a large hill creating exciting but demanding approach shots.

“ Tom Eubank and his company Golf Sign & Design are simply the best in the golf industry. Tom fully understands the golf business and its unique challenges. He and his team deliver unique, quality products on time, every time. I would highly recommend Tom & Golf Sign & Design for any golf facilities, on course and clubhouse needs. ”

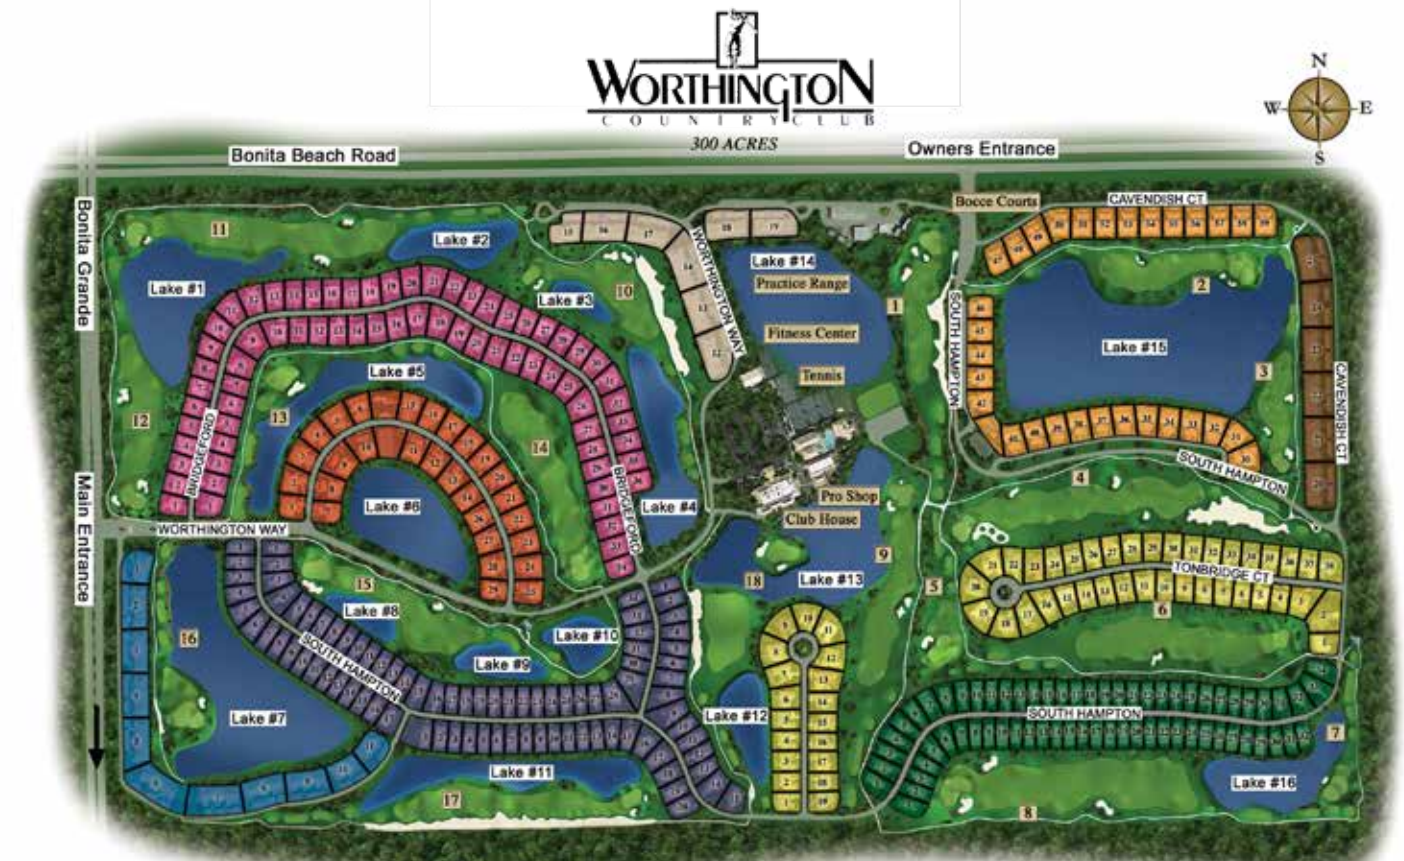

Tom Dyer, Director of Golf Panther National, Palm Beach Gardens, FL

“ Tom Eubank takes the concepts I create and puts them into a 3D format that I can present to my clients to show what the final design will look like. The details in the rock walls, trees, and elevation movements are exceptional. They always meet their deadlines and have been very easy to work with. ”

Kipp Schulties, Designer
Kipp Schulties Design,
Jupiter, FL

We work with many architects to make their vision come to life. Using CAD drawings accompanied with desired design features we are able to create astonishing 3D renderings.

• GOLF COURSE DESIGN • Hole 15A

Photo touch up and editing is one of many skills that we embody at GSD, as seen here with Cabo Sans where we implanted a new sky.

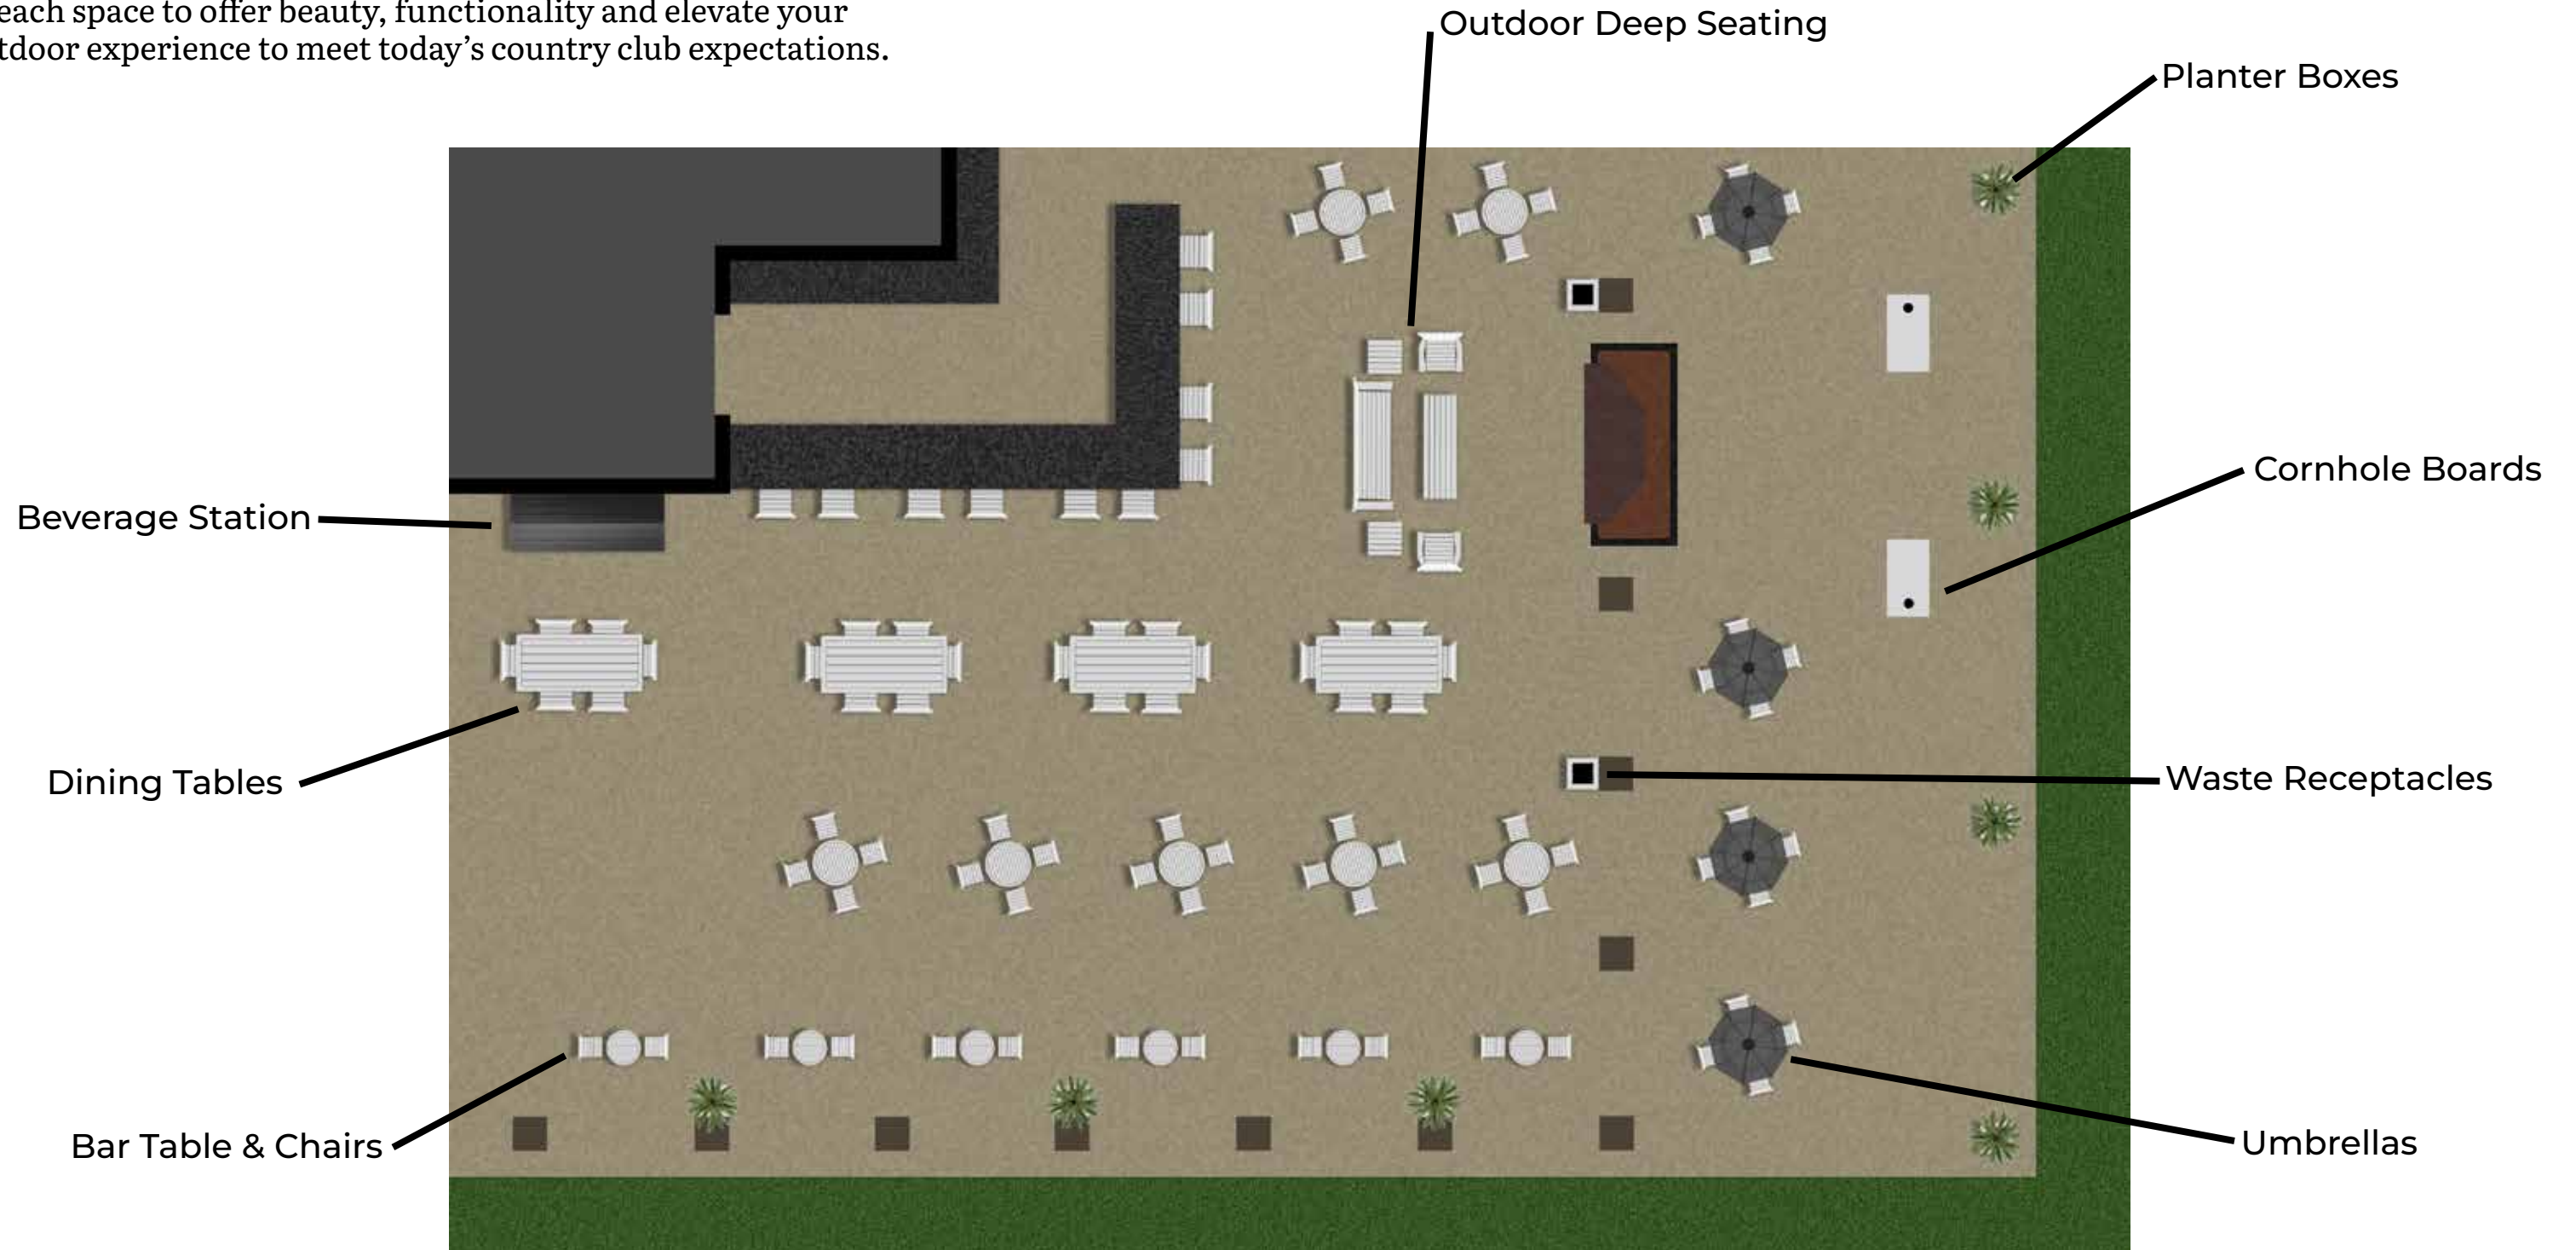

We also offer high quality drone photo and video flyovers.

Let us design your space

We invite you to collaborate with our professional design team to maximize your outdoor dining and/ or entertainment area. We can bring your vision to life through careful scale designing of each space to offer beauty, functionality and elevate your outdoor experience to meet today's country club expectations.

Furniture Orders

Code	Codes are located below the item throughout the catalog. For custom items please provide as much detail from the following categories as possible.
Style	Determine if you want the item in Key Arch (KA) or Straight Frame (SF). If applicable determine the roof style: Flat (F), Gable (G), or Pyramid (P).
Size	If applicable determine your required capacity, and/ or height: Ground (G), Mid Level (M), or Raised (R).
Color	Refer to our colors (see pg. 6) and decide on a body and trim combination. Wood grains are a 7% upcharge. Two- tones are never an additional cost.
Logo	We require at least 300 DPI files for logos. Logos must be in one of the following formats: Illustrator, PNG, PDF, or EPS.
Special Instructions	If you have any special requirements for your order feel free to let our team know.
Additional Information	We request the following to place an order: <ul style="list-style-type: none">• Contact Name• Phone Number• Email Address• Billing Department Contact• Shipping Address• Special Shipping Requirements (Liftgate. Etc.) * Liftgates cost double if not ordered ahead of time. Even if the truck has a liftgate on it..... they charge for us to use it. Please let us know ahead of time in order to save you money.

Signage Orders

Shape	Choose from our standard options listed on the product page. Custom shapes may be available for an additional cost.
Material	Choose from our selection of sign media: Cast Aluminum, Cast Bronze, Sheet Aluminum, Resin Core, or HPL.
Size	Provide us with exact size required for your product. Having trouble with determining sizing, let us know how we can help.
Mounting Style	Select on a mounting style best suited for your signage (see pg. 109)
Color	We have a wide variety of colors we are able to use on your sign order. However, exact PMS color matches are not possible. We will get as close as we can but due to the type of paint on cast signs and the print process on HPL, we can only get close to your PMS colors for the club.
Logo	We require at least 300 DPI files for logos. Logos must be in one of the following formats: Illustrator, PNG, PDF, or EPS.
Posts	Upon choosing posts we need the size, shape (see pg. 108), and material (see pg. 114).
Special Instructions	If you have any special requirements for your sign feel free to let our team know.
Additional Information	We request the following to place an order: <ul style="list-style-type: none">• Contact Name• Phone Number• Email Address• Billing Department Contact• Shipping Address• Special Shipping Requirements (Liftgate. Etc.) * Liftgates cost double if not ordered ahead of time. Even if the truck has a liftgate on it..... they charge for us to use it. Please let us know ahead of time in order to save you money.
